CHASE R. HAMILTON

Senior Linux Infrastructure & Enterprise Storage Systems Engineer

📍 Dallas-Fort Worth, TX (100% Remote US) 📞 (469) 878-2466 ✉ chaserhamilton@gmail.com

💼 Target: $140,000 – $175,000+

EXECUTIVE SUMMARY

Senior Infrastructure and Storage Systems Engineer with over 12 years of enterprise hands-on leadership directing mission-critical Linux (RHEL 8/9, Ubuntu, CentOS), SAN/NAS storage arrays, hypervisor clusters, and high-performance server architectures. Extensive expertise in enterprise storage lifecycle management (Dell EMC PowerEdge/PowerStore, NetApp, iSCSI, Fibre Channel, LUN masking/zoning), disaster recovery (DR) protocols, and high-availability operations supporting >99.99% uptime SLAs across Dell Technologies and Rolls-Royce. Proficient in automated systems management, Bash/Python/PowerShell automation, and bare-metal server provisioning.

TECHNICAL CAPABILITIES & DOMAIN MATRIX

Linux Systems Engineering:	Red Hat Enterprise Linux (RHEL 8/9), Ubuntu Server, CentOS, Debian, kernel tuning, systemd unit management, PAM/SSH security hardening, Bash shell scripting, automated package repos.
Enterprise SAN & NAS Storage:	Enterprise SAN/NAS arrays, Dell EMC PowerEdge/PowerStore, NetApp, iSCSI, Fibre Channel (FC), LUN provisioning, mapping & masking, RAID configurations, snapshot replication, ZFS/NFS architectures.
High Availability & DR:	Disaster Recovery (DR) runbooks, multi-site failover, RPO/RTO optimization, automated snapshot policies, enterprise backup retention, storage tiering, zero-downtime maintenance windows.
Virtualization & Hybrid Cloud:	VMware vSphere / ESXi (7.0/8.0), vCenter clusters, Hyper-V, Proxmox, Azure Cloud, Active Directory integration, PXE/OSD automated network deployment.
Automation & Telemetry:	Python 3.12, Bash, PowerShell 7.x, REST APIs, Git, automated storage health telemetry, disk-threshold watchdog daemons.

PROFESSIONAL EXPERIENCE

Senior Infrastructure & Storage Systems Engineer | Dell Technologies — July 2019 – Present

- Architect and oversee enterprise storage operations, LUN allocations, volume expansion, and SAN/NAS storage upgrade roadmaps across distributed production data centers.
- Direct Linux and Windows server health monitoring, high-availability clusters, and storage array reliability, consistently sustaining >99.99% uptime SLAs.
- Lead Tier-4 engineering investigations and root cause analysis (RCA) on complex OS kernel panics, storage I/O bottlenecks, and hypervisor storage fabric disruptions.

- Collaborate with platform architecture and network teams to install, configure, and maintain high-density compute nodes, fiber switches, and multi-petabyte storage arrays.
- Develop automated health verification scripts in Bash and PowerShell to proactively alert on disk threshold warnings and drive failures before service degradation occurs.

Sr. IT Infrastructure Engineer & Systems Manager | Rolls-Royce June 2014 – March 2017

- Engineered and administered 80–90% virtualized corporate infrastructure across VMware ESXi, Azure hybrid cloud, and bare-metal server environments.
- Maintained enterprise SAN storage connectivity and continuous high availability for critical databases supporting DB2, Microsoft SQL Server, Oracle DB, and MySQL.
- Coordinated circuit design, storage provisioning, and vendor SLA compliance following strict LLD (Low-Level Design) architectures.
- Spearheaded fourth-level engineering escalations, network integration standards, and identity federation clusters.

Sr. Infrastructure Systems Lead | Army Medical Treatment Facilities Worldwide Nov 2016 – June 2019

- Commanded global infrastructure deployments and operating system updates across **21,000+ endpoints worldwide**.
- Engineered PXE network boot configurations and OSD task sequences across distributed subnets and router boundaries.
- Authored automated software distribution scripts and validation routines, drastically accelerating system deployment velocity.

CERTIFICATIONS & CONTINUING EDUCATION

Red Hat Certified System Administrator (RHCSA EX200) (In-flight / Prepared) • **CompTIA Security+ (SY0-701)** (In-flight / Prepared) • **ITIL Foundation** • **ISO Standards & Compliance Training**
