CHASE R. HAMILTON

Senior Infrastructure Security & Vulnerability Remediation Engineer (SecOps)

Dallas-Fort Worth, TX (100% Remote US) (469) 878-2466 chaserhamilton@gmail.com

Public Trust / Defense Healthcare Trust Background

EXECUTIVE SUMMARY

Security-driven **Infrastructure & Systems Security Engineer** with 12+ years of enterprise experience securing mission-critical compute, hybrid cloud, and distributed endpoint environments. Proven authority in enterprise-wide vulnerability remediation and zero-day patch deployments across **21,000+ endpoints worldwide** for Army Medical Treatment Facilities. Direct experience hardening enterprise Linux and Windows systems against NIST Cybersecurity Framework (CSF), DISA STIGs, and HIPAA standards. Developer of custom security audit tools (VulnGuard CVE scanner) and automated incident triage pipelines.

TECHNICAL CAPABILITIES & SECURITY DOMAIN MATRIX

Vulnerability & Patch Mgmt:	CVE/NVD feeds triage, zero-day remediation, WSUS/SCCM SUP enterprise patching, automated patch scheduling, package repository verification, endpoint patch validation.
Compliance & Security Standards:	NIST CSF, DISA STIG compliance, Defense Healthcare standards, HIPAA, ISO security controls, perimeter audit logging, server baseline hardening.
Systems & OS Hardening:	Red Hat Enterprise Linux (RHEL 8/9), Ubuntu Server, Windows Server (2012–2025), PAM/SSH authentication controls, systemd sandboxing, Group Policy Objects (GPO), Sysmon telemetry.
Network & Perimeter Defense:	Cisco ASA firewalls, Clean Access Manager, IPsec VPN tunnels, SSL/TLS certificate management, RSA multi-factor authentication (MFA) tokens, zero-trust network access.
Security Tooling & Automation:	Python 3.12, PowerShell 7.x, Bash, VulnGuard (CVE auditor), Windows Event Viewer triage, automated sentinel watchdogs, REST APIs.

PROFESSIONAL EXPERIENCE

Infrastructure Security & Systems Lead | Army Medical Treatment Facilities Worldwide — Nov 2016 – June 2019

- Commanded zero-day security updates and patch deployments across **21,000+ endpoints worldwide** using SCCM Software Update Points (SUP) and WSUS.
- Elevated defense IT security preparedness through the rapid standardized deployment of critical security controls, cutting vulnerability exposure windows by over 70%.
- Replaced legacy, high-cost third-party patch software with native automated deployment pipelines, saving hundreds of thousands of dollars in licensing fees.

- Enforced compliance with Defense Healthcare STIGs, patient privacy mandates, and local admin privilege boundaries across global hospital networks.
- Analyzed endpoint client logs, PXE network boot traces, and installation telemetries to diagnose and resolve deployment failures immediately.

Senior Infrastructure & Security Systems Engineer | **Dell Technologies** July 2019 – Present

- Supervise and enforce enterprise security controls, operating system patches, and access management across multi-tiered enterprise infrastructure.
- Conduct deep incident analysis on system alerts, storage failures, and security exceptions to isolate vulnerabilities and prevent recurrence.
- Administer disaster recovery protocols, LUN security policies, and automated server file restoration to protect against ransomware and catastrophic failure.
- Partner with enterprise security architects to validate firewall configurations, certificate installations, and server baseline compliance.

Sr. IT Infrastructure Engineer & Access Lead | **Rolls-Royce** June 2014 – March 2017

- Administered enterprise identity and authentication services including multi-forest Active Directory, Exchange mail clusters, and RSA two-factor token servers.
- Implemented all required configuration changes, security hotfixes, and application patches across physical and virtualized server tiers.
- Monitored server, application, and security audit logs for anomalies, privilege escalation attempts, and performance bottlenecks.

Data Center Solutions Strategic Engineer & Security Lead | **Digital Realty Trust / Allied Barton** 2013 – 2014

- Enforced strict physical and digital perimeter security compliance across hyper-scale multi-tenant colocation data centers.
- Supervised biometric access points, surveillance telemetry archives, and environmental facility security controls.

ENGINEERED SECURITY PROJECTS & CERTIFICATIONS

- **VulnGuard (Automated Vulnerability & CVE Triage Suite):** Developed a Python/FastAPI-powered vulnerability assessment engine that cross-references installed OS and software packages against the National Vulnerability Database (NVD) to calculate CVSS severity and recommend prioritized patch actions.
- **Automated Security & Sentinel Watchdogs:** Engineered resilient background daemons in Python and PowerShell that monitor system processes, unauthorized port changes, and disk capacity alerts with real-time incident notifications.

CompTIA Security+ (SY0-701) (In-flight / Prepared) • **Red Hat Certified System Administrator (RHCSA EX200)** (In-flight / Prepared) • **ITIL Foundation** • **Defense Public Trust Background**
